## SuDoku anyone?

If you're new to SuDoku, the aim of the puzzle is to enter a number from 1 through 9 in such a way that each row, column, and region contains only one instance of each number. Though Sudoku puzzles use numbers, they don't require advanced mathematical skills and can be solved using logic alone. Warning: May be addictive! (Answers on last page)

A piano has been donated  
to the Village Square.

If there is interest in giving or  
taking lessons, contact Errol Reid  
645-4073

## Teen Talk

There's plenty of space for a  
submission from the younger  
generation!! Stories, poems,  
"what's happenings" .....

Just send to
